Education

Purdue University

Bachelor of Science in Computer and Information Technology

Indianapolis, IN

Graduated May 2026

Technical & Systems Analytics Competencies

Data Analytics & Modeling: End-to-End Analytic Pipelines, Exploratory Data Analysis (EDA), Hypothesis Testing, Algorithm Formulation, Complex Dataset Manipulation, Quantitative Analysis

Databases & Systems: PostgreSQL (Supabase), MySQL, MongoDB Atlas, Relational & NoSQL Database Architecture, Data Modeling, Schema Design

Full-Stack & Languages: Python, JavaScript, SQL, Node.js, HTML/CSS, React, RESTful APIs, Git, GitHub (Shared Version Control Environment)

Visualization & Tools: Power BI, Tableau, Advanced Excel, Interactive Web Visualizations, Data Storytelling, Technical & Sponsor Documentation

Certifications & Languages: Data Analysis Professional Certificate (Coursera), AI Integration Professional Certificate (Coursera) | English (Fluent), Spanish (Proficient)

Systems Engineering & Analytics Projects

End-to-End Real-Time Analytic Pipeline (IndyAssists) | *Python, Node.js, REST APIs, Gemini AI, Supabase, Git* **March 2024 – April 2024**

- Engineered an end-to-end data analytic pipeline integrating real-time streaming transit coordinates and dining datasets via REST APIs.
- Formulated automated parsing algorithms and integrated Google Gemini API to enable open-ended natural language query processing across structured and unstructured data.
- Implemented Supabase OAuth security layers and deployed interactive visual mapping components to translate raw spatial feeds into intuitive, actionable user insights.

Large-Scale Polyglot Data Analytics System | *Python, SQL, PostgreSQL, MongoDB, Node.js* **April 2026**

- Manipulated, cleaned, and analyzed a real-world Kaggle dataset consisting of 99,000+ order records to evaluate multi-dimensional operational metrics.
- Architected a polyglot database pipeline combining PostgreSQL for transactional data integrity with MongoDB Atlas for unstructured catalog and review feeds.
- Formulated complex MongoDB aggregation algorithms (\$facet, \$lookup) to execute single-pass statistical queries and optimize system retrieval performance.

Healthcare Information & Analytics Platform (MedSearch) | *SQL, Supabase, JavaScript, React* **May 2024 – Aug. 2024**

- Aggregated complex pharmaceutical datasets, creating structured data models to analyze side-effect profiles and medical risk correlations.
- Wrote custom SQL queries in Supabase for multi-variable data filtering, ensuring high data accuracy and query responsiveness.
- Presented complex analytical output in a clear, user-centric interface to support informed decision-making for non-technical users.

Experience

Tigers College Consulting

Full-Stack & Analytics Developer

Princeton, NJ

Sept. 2023 – Oct. 2023

- Collaborated in a shared developer environment using Git to overhaul digital systems, analyzing traffic data to optimize user engagement pathways and drive 20,000+ site impressions.
- Worked closely with non-technical stakeholders to translate business goals into functional web solutions and technical documentation.
- Provided educational guidance and structured mentoring to students, demonstrating strong oral, written, and presentation skills.
